

CYBER EDUCATION LITERATURE SERIES

CyberPatriot – AFA's National Youth Cyber Education Program

The Air Force Association's CyberPatriot National Youth Cyber Education Program was created to motivate K-12 students toward careers in cybersecurity and other STEM disciplines.

In the fall of 2017, CyberPatriot launched its Cyber Education Literatures Series to excite the youngest of computer users about cybersecurity.

SARAH THE CYBER HERO

Sarah lives in a town full of superheroes, but she has yet to earn her own superhero cape. The tradition is that when you save the day you earn your cape, but how will Sarah ever get a cape when her older brother, Andy, swoops in every time!

One fateful day, Andy downloads a malware virus on the family computer – one that infects the whole town.

Luckily, a school cyber education program has been teaching Sarah all about cyber safety and how to protect a computer from intruders. Can she use her new cyber skills to stop the dreaded virus from spreading?

ACTIVITY BOOK

Coming in Fall 2018, the Sarah the Cyber Hero activity book is the perfect companion to the exciting story. This activity book is where cybersecurity and creativity come together! Young children will love the adventure of coloring the characters of the action-filled story while using their own cyber skills! The premise of a young girl that saves the day in the most unexpected way will inspire students to be heroes in their own cyber story, learning cyber vocabulary and cyber tips to keep them safe online.
